

MSD Lawrence Township Inclement Weather Impact on Schools

Beliefs and Expectations:

- Parents have a child specific perspective regarding their child and the threat of inclement weather.
- A parent may make a determination for their child. The district respects a parent's decision regarding their child's attendance at school during inclement weather. If school is open or delayed because of inclement weather, the school will respect the decision of the parent should they decide to keep their child home. Parents are expected to contact the school and inform school officials of their decision. **The student will be counted absent, per state code, and will be given an opportunity to complete their academic work in the same manner as an excused absence from school.**
- MSDLT leaders believe the public expects schools to be open and to provide education, supervision, and other services (including meals) to its students.
- The MSDLT believes that all parents are committed to the safety of their children and expect that children will be dressed appropriately for the weather when they are sent to school.
- Central Indiana experiences variable weather conditions. The MSDLT expects that parents have plans in place for weather related delays and closures and believe morning notification is generally appropriate.

Variables That Could Result in Delay or Closing:

Freezing Rain/Sleet

- The most unpredictable weather variable is freezing rain/sleet. Freezing rain/sleet is weather sensitive and fast-occurring. It begins and ends with little notice. When freezing rain/sleet are predicted, the decision regarding school is delayed until the latest possible time in an effort to observe the most current and local conditions. ***Such a decision will generally be made in the morning.***

Snowfall

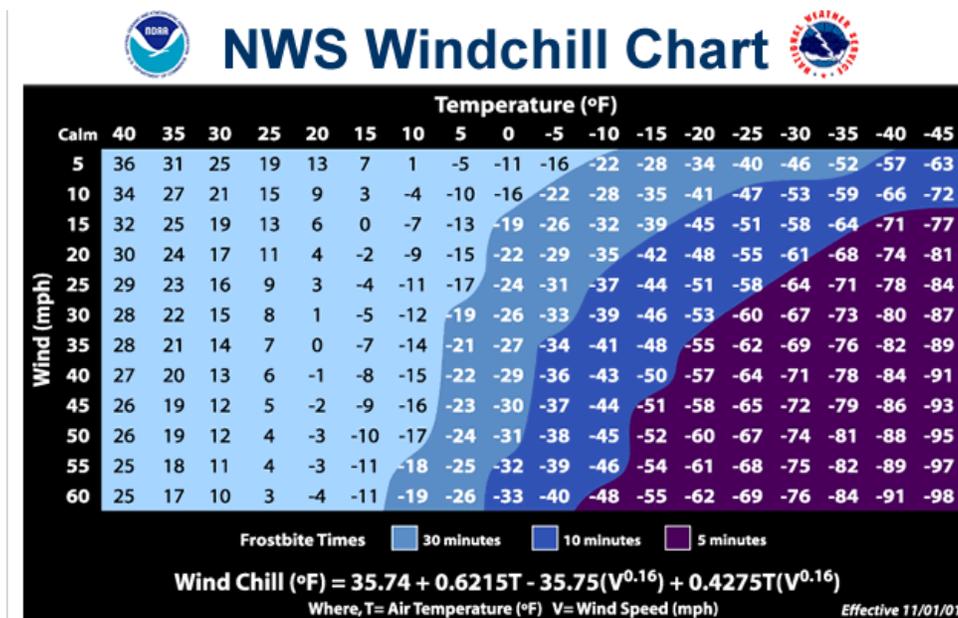

- Snowfall is more predictable than freezing rain/sleet. Meteorologists generally give a two (2) inch variable when predicting snow accumulation. Because the actual snowfall when compared to predicted snowfall may vary, the decision regarding school status is delayed until the snow accumulation indicates a need for action. ***Such a decision, except in extreme situations, will generally be made in the morning.***

Extreme Snowfall Situations

- When snow has accumulated to a significant level, or is at such a level with more snowfall predicted, then ***the decision regarding school may be made the previous evening.*** A significant level is one in which local authorities have indicated it is unlikely streets will be passable by the following morning. This is an unlikely, but possible occurrence.

Extreme Wind Chill

- Wind chill prediction is not as accurate as temperature prediction because wind speed is more variable by time and location. While NOAA observations and predictions are based upon the open conditions of Indianapolis Airport, these conditions are often different throughout Marion County. Local observations of wind speed will affect the decision regarding delaying or closing school. Wind chill concerns emerge at a predicted wind chill temperature of -15 degrees or below and local wind conditions are predicted to mirror the airport wind conditions at 7:00 A.M., the district will consider a two (2) hour delay for the start of school. If the wind chill is predicted to remain at -15 degrees or below and local conditions mirror the airport wind conditions at 9:00 A.M. the district will consider closing. ***The variability of the wind speed will likely cause the decision to be made in the morning.***

Functional Facilities

- Utility issues (gas, electricity, water) may cause a school to close. Issues associated with cold, including water supply to a building and electricity to a building or neighborhood, may cause school to be cancelled.

Extreme Cold

- Temperature prediction is increasingly accurate. The MSD Lawrence Township uses the hourly temperature predictions for its zip code from the National Oceanic and Atmospheric Administration (noaa.gov). If air temperature is predicted by NOAA to be -10 degrees or below (the starting point for wind chill concerns with calm wind) at 7:00 A.M. the district will consider a two (2) hour delay for the start of school. If the air temperature is predicted to remain at -10 degrees or below at 9:00 A.M. the district will consider closing. ***Such a determination will be made as early as possible, perhaps the evening before, but certainly by 6:00 A.M. in the morning.***
